

Sending an e-invoice to Inera AB

Legislated e-invoice requirement

From 1 April 2019, you as a supplier to Inera AB must send us an e-invoice. *Note that PDF is not an approved format.*

In June of 2018, the Riksdag decided to adopt the Act regarding e-invoicing in public procurement (SFS 2018:1277). The Act means that all purchases made in accordance with procurement acts such as LOU, LUF, LUF3 or LUK shall be billed using e-invoices. Purchases made by us, Inera AB, shall therefore be billed using e-invoices. Also remember to include our reference in the invoice.

- **If you already use e-invoices**

Inera AB can receive invoices via the PEPPOL network. In that case, you need to connect via a company that supports your e-invoicing via PEPPOL. Check whether your accounting / invoicing system supplier or e-invoice service can use the PEPPOL network.

Inera AB's **PEPPOL-ID is 0007:5565594230 or 0088: 7365565594238**. The formats that we can receive via the PEPPOL network are Svefaktura 1.0 and PEPPOL BIS Billing 3.

Another alternative is to use our VAN service via InExchange. Our parts-ID is **GLN 7365565594238**. Contact InExchange via the e-mail address below if you have questions.

- **If you currently do not use e-invoices**

If you do not have a business system:

Use our invoicing portal <https://web.inexchange.se/InExchange/Mottagare/inera/>

It is possible to register and send up to 100 invoices without any cost.

If you have a business system:

It is often possible to create e-invoices in existing business systems/accounting systems. Check with your system supplier. E-invoicing services can also be purchased from certain companies in order to achieve the same thing, as can the installation of a "virtual invoice printer".

Contact us:

If you have any questions contact our VAN-service InExchange AB

www.inexchange.se/e-faktura, +46 500-44 63 60 or faktura@inera.se.
